EDUCATION

Carnegie Mellon University, Heinz College, Pittsburgh, PA
Master of Science in Information Security Policy & Management

August 2023 - May 2025

Earlham College, Richmond, IN
Bachelor of Arts, Computer Science

May 2023

- Honors Program & McNair Program | Interacted with Earlham alumni and industry professionals at various events

SKILLS & COURSEWORK

Tools: Ansible, Linux/Unix, Wireshark, Snort, Kibana, Splunk, SiLK, Pfsense, Metasploit

Coursework: Networks and Internet Security, Ethical Penetration Testing, Software and Security, Network Defenses, Cybersecurity Policy and Governance

Programming Languages: Python, C, Bash, Kotlin, SQL, Java, PowerShell

Databases: PostgreSQL, MySQL

Certifications: CompTIA Security+

ACADEMIC PROJECTS

Installation of HPC Cluster | System Administration Applied Group

- In a team of 4, utilized Ansible to deploy and configure DNS, DHCP, and switches into existing cyberinfrastructure

Web Goat Penetration Testing | Software and Security

- Identified and Exploited Vulnerabilities in the Web Goat App, using tools such as ZAP, Burp Suite and Nessus

Network Defense Tools Labs | Network Defenses

- Utilized Network defense tools (Snort, Splunk, and Pfsense) to identify potential vectors of attacks in various labs

Shopping Application | Data Focused Python

- Led a team of 5 in constructing a Shopping Cost Application. Developed a business plan to decrease grocery costs for Pittsburgh students. Utilized Google Cloud Maps API to identify store locations with low prices

RELEVANT EXPERIENCE

MSA The Safety Company, Cranberry Twp, PA

May 2024 - August 2024

Cybersecurity Intern

- Established a MISP Server, advancing the security teams' Threat Intelligence capabilities. Decreasing MSA's financial burden by an average of 50,000 dollars per year on commercial threat feeds
- Utilized APIs to augment capabilities of SIEM, Firewalls, and MISP server, orchestrating data from each improved security analytics
- Designed Powershell and Python scripts to automate repetitive and lengthy tasks, reducing average time by 70%
- Employed Nmap to simulate 6 types of network scans against Firewalls to ensure alarms were configured correctly
- Implemented an External Server, reducing complexity when aggregating log data from various sources into the SIEM

Paulsen Coaching, Remote

June 2023 - Present

Sales Development Representative

- Curated Sales, Negotiation and verbal communication skills through B2B Cold Calling and customer interaction

Earlham College, Richmond, IN

August 2020 - January 2023

System Administration Applied Group

- Problem-solved server and cluster issues in the Computer Science department ensuring user access to services
- Developed 2 new servers and 1 new cluster. Created virtual sandbox for system updates using Xen and Docker
- Suggested and created Virtual Sandbox for all 8 system administrators; software installations and patches were now able to be tested before implementation on production servers
- Mended and maintained 8 public desktops, testing user privileges, firewall access, and LDAP authentication

Carnegie Mellon University-Heinz, Pittsburgh, PA

Summer 2022

IT Lab Fellow

- Led a cross-functional team of three along with USSTRATCOM personnel, on research on Deterrence Theory; documenting findings in research paper and presenting to USSTRATCOM officials and CMU faculty
- Tested knowledge of cloud security fundamentals by undergoing AWS Certified cloud foundation course and labs
